DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1 and 15 are rejected under 35 U.S.C. 102(a) as being anticipated by Huster (DE10203075).

Huster discloses an air-suspension system for a vehicle comprising a compressed-air delivery device 28, a plurality of air-suspension bellows 5-8, valves 15-18 constructed and arranged for controlling the filling of at least one of the air-suspension bellows with compressed air from the compressed-air delivery device 28, the arrangement of the valves defining a plurality of states, and means for automatically controlling the effective delivery capacity of the compressed-air delivery device as a function of a state of the plurality of states defined by the arrangement of the valves.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huster (DE10203075) in view of Roemer, et al. (DE10055108).

Huster discloses the claimed invention except for controlling at least one of speed and rpm of the compress-air delivery device. Roemer discloses an air-suspension system comprising a pump 20. Based on the teachings of Roemer, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the system of Huster to include a pump to improve the flow of the air of the suspension system.

Allowable Subject Matter

5. Claims 5-8, 10-14, 18-22 and 24-28 are allowed.
6. Claims 3, 4 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
